

BENGUET STATE UNIVERSITY
NOTES TO FINANCIAL STATEMENTS
For the year ended December 31, 2019
(All amounts in Philippine Peso)

1. General Information/Agency Profile

The financial statements of Benguet State University were authorized for issue on February 10, 2019 as shown in the Statement of Management Responsibility for Financial Statements signed by Dr. Feliciano Calora Jr. of the Office of the President, BSU.

The Benguet State University (BSU) was created by virtue of Presidential Decree No. 2010 dated January 12, 1986.

The University is mandated by its charter to provide undergraduate courses in arts, sciences, humanities and professional fields in agriculture, natural sciences, technology and other technical and professional courses as the Board of Regents may determine and deem proper. It shall promote research, extension and agribusiness and advanced studies and progressive leadership in its field of specialization.

2. Statement of Compliance and Basis of Preparation of Financial Statements

The financial statements have been prepared in accordance with and comply with the Philippine Public Sector Accounting Standards (PPSAS) issued by the Commission on Audit per COA Resolution No. 2014-03 dated January 24, 2014 and COA Circular 2015-007 dated October 22, 2017.

The financial statements have been prepared on the basis of historical costs, unless stated otherwise. The Statement of Cash Flows is prepared using the direct method.

3. Summary of Significant Accounting Policies

3.1 Basis of accounting

The financial statements are prepared on an accrual basis in accordance with the Philippine Public Sector Accounting Standards (PPSAS).

3.2 Consolidation

Consolidated entities

The financial statements reflect the assets, liabilities, revenues and expenses of the reporting entity. Effective CY 2015, the University adopted fund cluster/fund sourcing, such as Regular Agency Fund, Internally Generated Income, Business Type, and Trust Funds.

The University continued to consolidate the funds for Main, Bokod and Buguias campuses into five fund category as follows:

Fund	Main Campus
Regular Agency Fund	✓
Internally Generated Income-Retained Income - (STF)	✓
Business Type Income-Off-Budgetary Funds	✓
TF-Custodial Funds-Trust Receipts	✓

3.3 Changes in accounting policies and estimates

The Benguet State University recognizes the effects of changes in accounting policy retrospectively. The effects of changes in accounting policy were applied prospectively if retrospective application is impractical.

The Benguet State University recognizes the effects of changes in accounting estimates retrospectively by including in surplus or deficit.

The Benguet State University correct material prior period errors retrospectively in the first set of financial statements authorized for issue after their discovery by;

- Restating the comparative amount for prior period(s) presented in which the error occurred; or
- If the error occurred before the earliest prior period presented, restating the opening balances of assets, liabilities and net assets/equity for the earliest prior period presented.

3.3.1 Benguet State University adopted the following new accounting policies:

On January 24, 2014, Benguet State University adopted the PPSAS No .3.27, PPSAS No. 3.30, PPSAS No. 3.41, PPSAS No. 3.47. The new standard includes the requirement for recognition, measurement, presentation and disclosures of and is effective for years beginning on or after January 24, 2014. The accounting changes have no significant impact on Benguet State University's consolidated financial statements. The Benguet State University continuously implementing the provision of Sections 26 and 32, Chapter 2; and Section 3, 4 and 5 of Chapter 10 of the Volume I of Government Accounting Manual effective calendar year 2016, as well as to COA Circular 2015-007 dated October 22, 2017.

3.4 Budget Information

The annual budget of the University is prepared on a cash basis and is published in the government website. A separate Statement of Comparison of Budget and Actual Amounts (SCBAA) was prepared since the budget and the financial statements were not prepared on the comparable basis. The SCBAA was presented showing the original and final budget and the actual amounts on comparable basis to the budget. Explanatory comments are provided in the notes to the annual financial statements.

3.5 Impairment of Non-Financial Assets

3.5.1 Impairment of cash-generating assets

At each reporting date, the Benguet State University assesses whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Benguet State University estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that were largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or the cash-generating unit (CGU) exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows were discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, recent market transactions were taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

For assets, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Benguet State University estimates the asset's or cash-generating unit's recoverable amount.

A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in surplus or deficit.

3.5.2 Impairment of non-cash-generating assets

The Benguet State University assesses at each reporting date whether there is an indication that a non-cash-generating asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Benguet State University estimates the asset's recoverable service amount. An asset's recoverable service amount is the higher of the non-cash-generating asset's fair value less costs to sell and its value in use.

Where the carrying amount of an asset exceeds its recoverable service amount, the asset is considered impaired and is written down to its recoverable service amount. The Benguet State University classifies assets as cash-generating assets when those assets were held with primary objective generating a commercial return. Therefore, non-cash-generating assets would be those assets from which the Benguet State University does not intend, as its primary objective, to realize a commercial return.

3.6 Employees benefits

The employees of Benguet State University are members of the Government Service Insurance System (GSIS), which provides life and retirement insurance coverage.

The Benguet State University recognizes the undiscounted amount of short term employee benefits, like salaries, wages, bonuses, allowance, etc., as expense unless capitalized and as a liability after deducting the amount paid.

The Benguet State University recognizes expenses for accumulating compensated absences when these were paid (commuted or paid as terminal leave benefits). Unused entitlements that have accumulated at the reporting date were not recognized as expense. Non-accumulating compensated absences, like special leave privileges, were not recognized.

3.7 Measurement uncertainty

The preparation of the financial statements in conformity with PPSAS requires management to make estimates and assumptions that affect the reporting amounts of assets and liabilities, and disclosure of contingent assets and liabilities, at the date of the consolidated financial statements and the reported amounts of the revenues and expenses during the period.

Estimates were based on the best information available at the time of preparation of the consolidated financial statements and were received annually to reflect the new information as it becomes available. Measurement uncertainty exists in these consolidated financial statements. Actual results could differ from these estimates.

7. INVENTORIES

Inventory is measured at cost upon initial recognition. To the extent that inventory was received through non-exchange transactions (for no cost or for a nominal cost), the cost of the inventory is its fair value at the date of acquisition. Costs incurred in bringing each product to its present location are accounted for, as follows:

- Raw materials: purchase cost using the weighted cost method
- Finished goods and work in progress: cost of direct materials and labor and a proportion of manufacturing overheads based on the normal operating capacity, but excluding borrowing costs.

After initial recognition, inventory is measured at the lower of cost and net realizable value. However, to the extent that a class of inventory is distributed or deployed at no charge or for a nominal charge, that class of inventory is measured at the lower of cost and current replacement cost.

Net realizable value is the estimated selling price in the ordinary course of operations, less the estimated costs of completion and the estimated costs necessary to make the sale, exchange, or distribution. Inventories are recognized as an expense when deployed for utilization or consumption in the ordinary course of operations of the Benguet State University.

8 PROPERTY, PLANT AND EQUIPMENT

Recognition

An item is recognized as property, plant, and equipment (PPE) if it meets the characteristics and recognition criteria as a PPE.

The characteristics of PPE are as follows:

- Tangible items;
- Are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes; and
- Are expected to be used during more than one reporting period.

An item of PPE is recognized as an asset if:

- It is probable that future economic benefits or service potential associated with the item will flow to the entity; and
- The cost or fair value of the item can be measured reliably.

Measurement at Recognition

An item recognized as property, plant, and equipment is measured at cost.

A PPE acquired through non-exchange transaction is measured at its fair value as at the date of acquisition.

The cost of the PPE is the cash price equivalent or, for PPE acquired through non-exchange transaction its cost is its fair value at recognition date.

Cost includes the following:

- Its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates;
- Expenditure that is directly attributable to the acquisition of the items; and

- Initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an entity incurs either when the item is acquired, or as a consequence of having produced the inventories during that period.

Measurement after Recognition

After recognition, all, property, plant, and equipment are stated at cost less accumulated depreciation and impairment losses.

When significant parts of property, plant, and equipment are required to be replaced at intervals, the Benguet State University recognizes such parts as individual assets with specific useful lives and depreciates them accordingly. Likewise, when a major repair/replacement is done, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied.

All other repair and maintenance costs are recognized as expense in surplus or deficit as incurred.

Depreciation

Each part of an item of property, plant, and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognized as expense unless it is included in the cost of another asset.

Initial Recognition of Depreciation

Depreciation of an asset begins when it is available for use such as when it is in the location and condition necessary for it to be capable of operating in the manner intended by management.

For simplicity and to avoid proportionate computation, the depreciation is for one month if the PPE is available for use on or before the 15th of the month. However, if the PPE is available for use after the 15th of the month, depreciation is for the succeeding month.

Depreciation Method

The straight line method of depreciation is adopted unless another method is more appropriate for agency operation.

Estimated Useful Life

The Benguet State University uses the Schedule on the Estimated Useful Life of PPE by classification prepared by COA.

The Benguet State University uses a residual value equivalent to at least five percent (5%) of the cost of the PPE.

Impairment

An asset's Carrying amount is written down to its recoverable amount, or recoverable service amount, if the asset's carrying amount is greater than its estimated recoverable service amount.

Derecognition

The Benguet State University derecognizes items of property, plant, and equipment and/or any significant part of an asset upon disposal or when no future economic benefits or service potential is expected from its continuing use. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the surplus or deficit when the asset is derecognized.
